

MYPTJ 6/10 kV Mobile Metal-enclosed Monitoring Type Rubber-sheathed Flexible Cable for Coal Mines

CABLE STRUCTURE:

Conductor:

Class 5 tinned copper

Conductor Shielding:

Rubber Type Semiconductive Inner Shielding

Insulation:

Power Core: EPDM Rubber (XJ-30)

Insulation Shielding:

Rubber Type Semiconductive Outer Shielding
+ Semiconductive Strip + Metal/Fiber Braided

Fillers (Optional):

Edge Gap Rubber Strip or Glass Fiber Rope

Inner Sheath:

EPDM Rubber (XJ-10)

Outer Sheath:

Mixture of Chlorinated Polyethylene or Other
Comparable Materials (XH-03)

SPECIFICATION RANGE:

3 Core Power Main Core:

25 - 150 mm²

1 Core Ground Wire Core:

Refer to the structural parameter table

Control Core:

3 × 2.5 mm²

STANDARD:

MT 818.6-2009

APPLICATION:

Suitable for power connections of underground
mobile transformers with a rated voltage not
exceeding 6/10 kV and similar equipment.

TECHNICAL DATA:

Rated voltage:(U₀/U)

6/10 kV

The maximum system voltage :(U_m)

1.1 times U

Temperature classification:

Maximum operating temperature of the conductor:
+75°C

Operating environment temperature:

-20°C to +45°C

Cable laying temperature: Not lower than 0°C
(When the ambient temperature is below 0°C,
the cable should be preheated.)

Min.Bending Radius:

6 × cable O.D

Finished product voltage test:

Power wire core: 21 kV / 5 minutes

Partial discharge:

1.73U₀ The discharge amount at this voltage
is no more than 20pC.

Installation method:

The laying of underground cables in coal mines is
divided into methods such as in level tunnels or
those below 45 °C, in chambers, and in vertical
shafts or in tunnels above 45 °C or in boreholes.

CERTIFICATES:

Our series of mining products have undergone
strict review by the National Coal Mine Safety
Supervision Bureau and have obtained the
Coal Mine Safety Mark Certification
(MA Certification), providing a reliable guarantee
for coal mine safety production.
